BREAKING NEWS: A storm is brewing

Reports are coming in from all over the island about a massive lightning storm approaching Club Penguin.

"I was looking out the binoculars, and suddenly I noticed this storm on the horizon," one penguin reported. "Its HUGE!"

Penguins are advised to check next week's newsletter for more information

Juan Dering

Dear Aunt Arctic,

I noticed that there's a scratching post in the pet catalog, but puffles don't have claws, do they?

-Juan Dering

Dear Juan Dering,

You're right. Puffles don't have claws. They're bouncy little critters and they would have little use for them. So why the scratching post? Have you ever had an itch you couldn't scratch? Sometimes I get that problem and I have to find something to scratch it. Well, just like you and I, puffles can rub their backs against a scratching post. If you buy one for your puffle, you can rest easy knowing that if you're not at home and it gets an itchy back, at least it can do something about it.

Attention: Aqua Grabber Pilots!

The best way to be an Aqua Grabber expert is to practice often. If you do this, you'll remember where treasures are hidden, when bubbles emerge, and where obstacles are placed. And make sure you go slowly. If you go fast, you lose more air.

Igloo Decorating Tips

I think my igloo has inspired lots of people. A good way to decorate your igloo is the way you are comfortable having it. Also, if it is Halloween in Club Penguin, make it spooky, or host a Halloween party for all of your friends! So remember, the next time you think your igloo is boring, make it comfortable, or to match a special holiday!
